

Natural Color Anodized Plate

The modern alternative for your decorating projects!

The natural color anodized plate, corresponding to the aluminum alloy AW 5005, is **the best option for your architectural and decorative projects**, because it guarantees a modern and futuristic final result!

Lightness and sustainability are some of the features you should take into account about this material, since it is 60% lighter than other types of metals and is 100% recyclable.

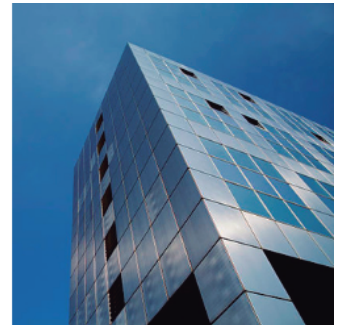

Versatility, too, is one of its main features, since it can be laminated, stamped, laser engraved, perforated, welded, or silk-screened.

You can apply the anodized plate in its natural color in various sectors, such as **Construction, Decoration, Design and Architecture.**

ADVANTAGES

- ◆ Weight reduction
- ◆ Consistent colors
- ◆ High resistance to corrosion and abrasion by anodizing
- ◆ Durability
- ◆ Production Efficiency

APPLICATIONS

- ◆ Architecture
- ◆ Construction
- ◆ Decoration and Design
